1 Getting started with PlantUML

This section contains sample **PlantUML** diagrams.

1.1 Set Up

Diagrams can be easily included by

```

1 \usepackage{./plantuml}
2 ...
3 % Includes diagram my-sequence-diagram.puml as a figure
4 % captioned "Sample UML diagram"
5 \includeplantuml{my-sequence-diagram}{Sample UML diagram}

```

1.2 Sample UML diagrams

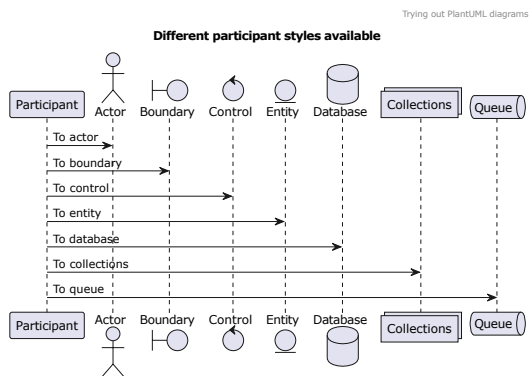

Figure 1: Types of participants supported by PlantUML

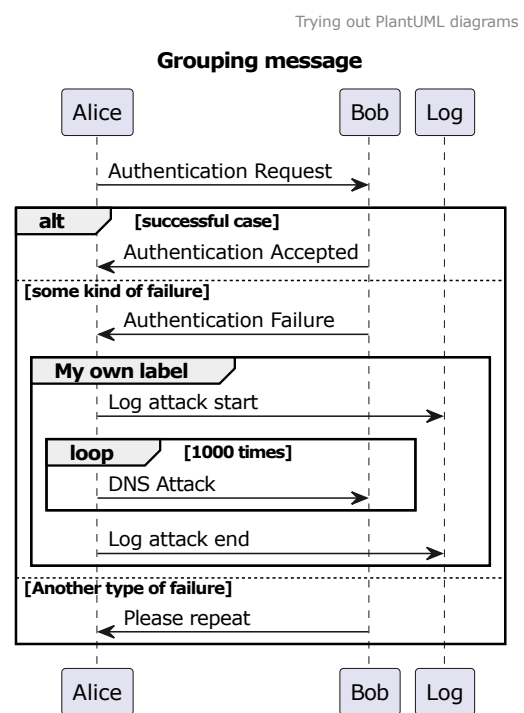

Figure 3: Grouping message

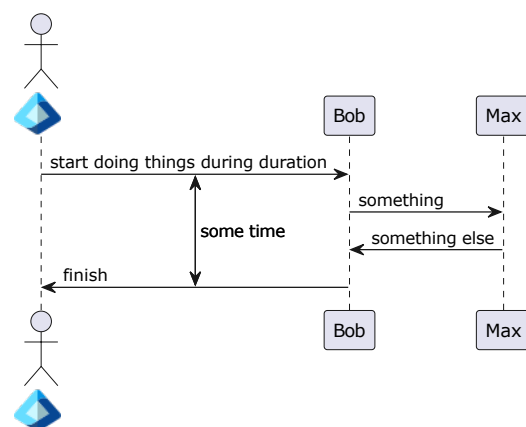

Figure 4: Anchors

1.3 A more complex example

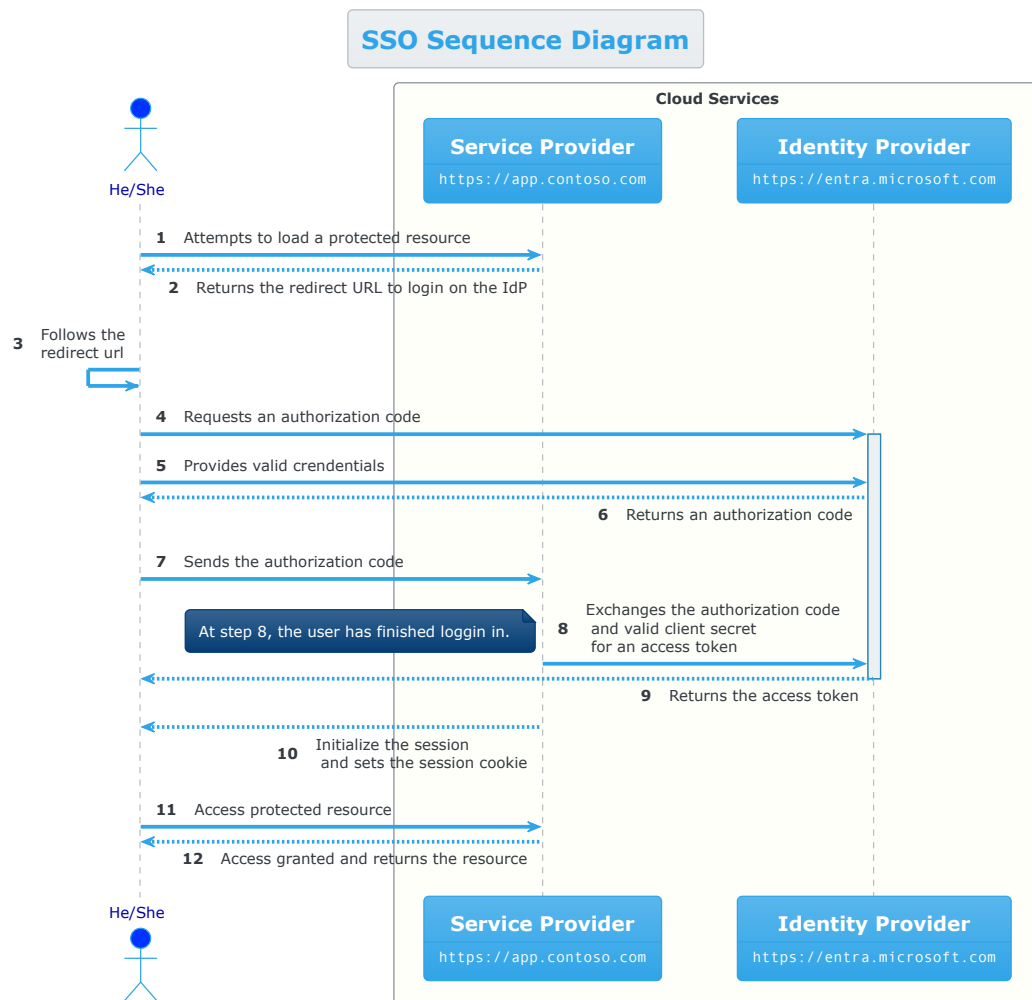

Figure 5: Sample diagram of SSO handshake

1.4 A Wireframe example

This example is configured with `\includeplantuml[width=\maxwidth]{puml}{Title}` to be as wide as possible and fit the page.

Figure 6: S.A.L.T.

1.5 Inlined UML diagram

UML diagrams can also be inlined in the `.tex` file, using:

```
1 \usepackage{./plantuml}
2 ...
3 % Includes inlined diagram as a figure captioned "Sample UML diagram"
4 \begin{plantuml}{Alice and Bob}
5   @startuml
6     Alice -> Bob: Hello
7     Bob -> Alice: Hi there
8   @enduml
9 \end{plantuml}
```

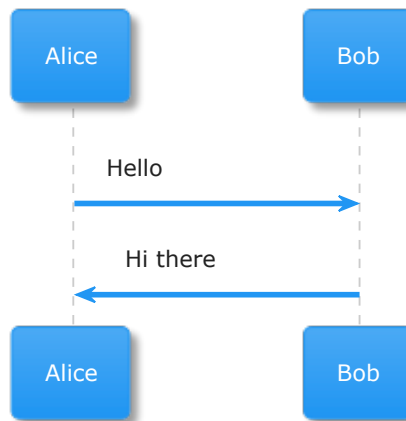

Figure 7: Alice and Bob

2 OIDC Authorization Code Flow

Identity is no longer a place you log into, but a trust you carry across boundaries-quietly verified, never exposed.

3 Source code snippets

This is a

`<h2>source code</h2>`

snippet:

I can type verbatim text too.

```
1  #[template]
2  #[html]
3  pub fn run() -> XElement {
4      let demo = Demo::new();
5      return div(
6          key = "root",
7          counter::counter_demo(demo.counter),
8          timer::timer_demo(demo.enable_timer, demo.timer),
9          api::api_demo(),
10         attributes::attributes_demo(),
11     );
12 }
```
